DT228/3 Cloud Computing CA 2
Picture Box Testing Document

By student C12474932 Marcus Daly

Testing Guest

- Start the application
- You should be given 2 options: sign in or view public images
- Select public images. Images should be displayed
- No buttons to delete any images should be displayed

Testing User

- Start the application.
- Sign in with a google account that isn't mark.deegan@dit.ie.
- You should be given a message saying you are a user, and have options to view your private images, view public images, upload an image and sign out.
- Select private images. No images should be visible.
- Select public images. Any public images that were visible to guest should be visible to you, but you should not have the option to delete any images.
- Select upload image and upload a public image. You should be redirected to public images where you should see your new image and have the option to delete it (delete does not work).
- Try uploading an image with ticking an radio button. It should default to public
- Repeat last step but select private instead of public.
- After testing admin, test user again to see the admin's public images. You should not see a prompt to delete them.

Testing Admin

- Start the application.
- Sign in with your google account mark.deegan@dit.ie.
- Repeat all steps of user, you should be able to see the option to delete any public photo now, not just the ones you own.
- If you upload a photo without ticking a radio button it should default to private
